CUT AND RETURN COMPLETED FORM TO YOUR PARTICIPATING ELECTRIC UTILITY

# When was the last time you had your home's cooling system tuned up?

If it has been a few years, now is the time to have your heating and cooling contractor inspect, service, and clean it. Typically tune-ups on cooling systems that have been neglected for a few years can provide energy savings of 5-15% or more. In addition the unit can perform better from a comfort and equipment longevity standpoint.

Fortunately there is a \$30 EnergyWise<sup>SM</sup> incentive available to homeowners who have their cooling system tuned-up, regardless of what type or age of cooling system it is (air conditioner, air or water source heat pump).

The application includes a checklist of key components your contractor should inspect as well as items for discussion, such as: filter replacement schedule, proper temperature set-back practices, and an understanding of the general condition of the system.

## \$30 incentive qualifications

- Incentives are available to customers who have their cooling system inspected and tuned-up by an HVAC contractor.
- Qualifying systems include residential central - air conditioners, air source and water source heat pumps that are served by Nebraska Public Power District or its Wholesale Utility Partners.

Incentives valid as of 1-1-2020. Subject to change without notice. Verify current incentive amounts and program information at [www.nppd.com](http://www.nppd.com). These EnergyWise<sup>SM</sup> programs are only available to customers of NPPD and customers of its wholesale utilities.
